Course Description

M_o_R® is a member of the Project and Programme Management suite of AXELOS. It stands for "Management of Risk" and considers risk from different perspectives within an organization: strategic, program, project and operational. The M_o_R® Foundation course provides delegates with an introductory overview of the processes, principles and techniques used in the M_o_R® approach. All subjects are covered in sufficient detail to allow delegates to practice the application of the guidance not only during the course, but also into their own organization.

The successful completion of the M_o_R® Foundation exam will give the delegate a recognized Foundation qualification. The Foundation level measures whether a delegate would be able to act as an informed member of a team or an organization using the M_o_R® method in a broad range of initiatives and disciplines, such as IT and Business continuity management, project / program risk management, operational service management, Security and Availability Management.

Course and Learning Objectives

Following the completion of the course participants will be able to:

- Learn, understand and use the most important concepts and terminology within the M_o_R® Guide.
- Specifically candidates should for any organizational perspective:
 - Know the facts, terms, concepts and relationships between the four elements of the M_o_R® framework (principles, approach, processes and embedding and reviewing)
 - Understand how the M_o_R® principles, approach, and processes are used
 - Be able to identify the M_o_R® framework documents and understand their uses and differences.
- Pass the Foundation Exam.
- Lay a firm Foundation knowledge to allow delegates to move onto Practitioner Level.

Course Approach

The course comprises a mixture of input sessions, group exercises and examination based practical work. All delegates are encouraged to actively participate during the practical sessions to gain the full benefit during the training. During the course, delegates will undertake a number of mock examinations and gain feedback on the progress towards eventual success. To prepare effectively for the M_o_R® Foundation exam, delegates should be prepared to undertake revision and exam preparation work in the evening.

Course Student Material

At the beginning of the course, students will receive a M_o_R® Foundation classroom workbook containing the presentation materials, course notes, case study and sample exams.

Empowering Professionals

Quint Academy is one of the world's largest IT training organizations. Worldwide, over 30,000 professionals choose Quint Academy every year. Since 1992, we have been successfully responding to the IT training needs of these professionals.

The portfolio of courses offered by Quint Academy is at the interface of business and IT, at the strategic, tactical and operational levels. The courses cover the entire spectrum of IT: Strategy, Business Information Management, Governance, Sourcing, Architecture, Innovation, Information Risk Management, IT Management, Lean IT & Agile, Portfolio Management, Program Management and Project Management. The curriculum of each course is aligned with the needs of the individual IT professional, from CIO to helpdesk co-worker. In our courses, we focus on imparting knowledge and know-how (hard skills) and we concentrate in particular on changing behavior and attitudes (soft skills).
