Course Description

M_o_R® stands for "Management of Risk" and considers risk from different perspectives within an organization: strategic, program, project and operational. The M_o_R® Practitioner course provides delegates with a deep and practical understanding of the processes, principles and techniques used in the M_o_R® approach to allow delegates to put in place the application of the guidance into their own organization.

The successful completion of the M_o_R® Practitioner exam will give the delegate a recognized qualification of expertise in the subject, meaning the capability to apply and use risk management into real environment and situations, being able to adapt M_o_R® into organizations to gain the broadest benefit from it.

Course and Learning Objectives

Following the completion of the course candidates should be able to apply and understand how to tailor M_o_R® effectively within an organization environment supporting M_o_R®. Specifically candidates should for any organizational perspective:

- Understand the relationships between the four elements of the M_o_R® framework
- Be able to apply the principles, approach, processes and techniques
- Be able to review and make recommendations to embed the M_o_R® framework
- Be able to create and assess any of the M_o_R® framework documents.

Course Approach

The course comprises a mixture of input sessions, group exercises and examination based practical work. All delegates are encouraged to actively participate during the practical sessions to gain the full benefit during the training. During the course, delegates will undertake a number of mock examinations and gain feedback on the progress towards eventual success. To prepare effectively for the M_o_R® Practitioner exam, delegates should be prepared to undertake revision and exam preparation work in the evening.

Course Student Material

At the beginning of the course, students will receive a M_o_R® Practitioner classroom workbook namely prepared for consultation during the exam, containing all the content allowed for the test. Alternatively, the students may want to bring their own "Management of Risk: Guidance for Practitioners" guide published by TSO, together with the APMG guidance documents "ABC Consulting Ltd. Sample Risk Documents" and "Worked Examples of some of the Common Techniques".

Empowering Professionals

Quint Academy is one of the world's largest IT training organizations. Worldwide, over 30,000 professionals choose Quint Academy every year. Since 1992, we have been successfully responding to the IT training needs of these professionals.

The portfolio of courses offered by Quint Academy is at the interface of business and IT, at the strategic, tactical and operational levels. The courses cover the entire spectrum of IT: Strategy, Business Information Management, Governance, Sourcing, Architecture, Innovation, Information Risk Management, IT Management, Lean IT & Agile, Portfolio Management, Program Management and Project Management. The curriculum of each course is aligned with the needs of the individual IT professional, from CIO to helpdesk co-worker. In our courses, we focus on imparting knowledge and know-how (hard skills) and we concentrate in particular on changing behavior and attitudes (soft skills).
